COMPARATIVE WORTH OF BAKING POWDERS.

ROYAL (Absolutely Pure). GRANT'S (Alum Powder) # ... RUMFORD'S, when fresh. AMAZON (Alum Powder) ... CLEVELAND'S short wt.joz. PIONEER (San Francisco) DR. PRICE'S SNOW FLAKE (Grof's) LEWIS' Lots Nos. I and 2 in Section N of W Smith's map of Beaver Dam, and on ANDREWS&CO."Regal" BULK (Powder sold loose)....

RUMFORD'S, when not fresh REPORTS OF GOVERNMENT CHEMISTS

As to Purity and Wholesomeness of the Royal Baking Powder. "I have tested a package of Royal Baking Powder, which I purchased in the open market, and find it composed of pure and wholesome ingredients. It of tartar powder of a high degree of merit, and does not contain eithe phosphates, or other injurious substances.

E. G. Love, I

"I have examined a package of Royal Baking Powder, purchased by myself in the market. I find it entirely free from alum, terra alba, or any other injurious sub-stance. HENRY MORTON, Ph.D., President of Stevens Institute of Technology." "I have analyzed a puckage of Royal Baking Powder. The materials of which s composed are pure and wholesome. S. Dana Harrs, State Assayer, Mass."

"It is a scientific fact that the Royal Baking Powder is absolutely pure.
"H. A. Morr, Ph.D."

The Royal Baking Powder received the highest award over all competitors at the Vienna World's Exposition, 1873; at the Centennial, Philadelphia, 1876; at the American Institute, New York, and at State Fairs throughout the country.

No other article of human food has ever received such high, emphatic, and universal endorsement from eminent chemists, physicians, scientists, and Boards of Health all over the world. Note-The above Discram filustrates the comparative worth of varie Powders, as shown by Chemical Analysis and experiments made by Prof. Schedier. A pound can of each powder was taken, the total leavening power or volume in each can calculated, the result being as indicated. This practical test for worth by Prof. Schedler only proves what every observant consumer of the Royal Baking Powder knows by practical experience, that, while it costs a few cents per pound more than ordinary kinds, it is far more economical, and, besides, affords the advantage of better work. A single trial of the Royal Baking Powder will convince any fair minded person of these facts.

While the diagram shows some of the alum powders to be of a higher degree of strength than other powders ranked below them, it is not to be taken as indicating that they have any value. All alum powders, no matter how high their strength, it has noticed us dangerous.

POSTPONEMENT THIS and Draw something
